

Mock US Form 1040 IRS Tax Dataset

Purpose: This synthetic dataset contains mock taxpayers, filing statuses, and core income line items matching standard IRS Form 1040 structures. It is optimized for validating OCR data extraction pipelines, database ingestion schemas, and financial analytics software.

Dataset Metadata

- **Format:** Tabular Synthetic Records
- **Schema Target:** Form 1040 (Individual Income Tax Return)
- **Total Fields Mapped:** 8 core metrics per record

Synthetic Taxpayer Records

Taxpayer Name / SSN	Filing Status	Line 1z Total Wages	Line 2b Taxable Int.	Line 8 Other Inc.	Line 9 Tot Income	Line 11 AGI	Line 24 Total Tax
